"This paper is a preliminary statement on a land utilization study now in progress in the Dorchester region of New Hampshire under the direction of H. C. Woodworth, Agricultural Economist of the New Hampshire Experiment Station. The authors have assisted in making a survey of the forest resources of the Town of Dorchester. How the land has been utilized from early settlement is briefly reviewed. The present forest resources of the area and their utilization are discussed. Public ownership of most of the woodlands along with a directed policy of social progress for the people is suggested as a possible solution to the problem." -p. 695.

Lovejoy, P. S. The worst-first theory. Jour. Forestry 24(4): 351-357. April 1926. 99.8 F768

The writer is critical of the policy of reforesting timberlands submarginal for intensive forestry while permitting "the steady wrecking and devastation of good, thrifty, self-renewing forests." He advocates giving our silviculture and our policies a dose of land economics and then proceeding boldly upon a "best-first" basis." The article applies particularly to Michigan.

The writer believes that the most satisfactory condition for an agricultural community is to have its land divided into reasonably small farms owned by individual farmers, although he recognizes that this method does not make for the greatest efficiency or bring the greatest wealth to the nation. To this end governmental policies in Puerto Rico and the Philippine Islands were shaped.

Science Advisory Board. Report...July 31, 1933 to September 1, 1934. 303pp. Washington, D. C. September 20, 1934. 330.9 Sci2

The Science Advisory Board was created by the Executive Order of President Roosevelt on July 31, 1933, "with authority, acting through the machinery and under the jurisdiction of the National Academy of Sciences and the National Research Council, to appoint

committees to deal with specific problems in the various departments." This report deals with the first year's operations of the Board, reports made, studies in progress and recommendations with respect to future work.

Part IV of the report is a summarized report of the activities of the Board. Included in the activities are a survey of the economic resources of the Boulder Dam region, soil erosion [preliminary recommendations on Soil Erosion and Critical Land Margins by C. O. Sauer and others is given in Appendix 8], and land-use problems [preliminary report on Land Resource and Land Use in Relation to Public Policy, by C. O. Sauer is given in Appendix 9]. Both of these reports are listed under the authors' names in the bibliography in progress in the Bureau of Agricultural Economics Library.
